Circulation Research

VOLUME 50 JANUARY–JUNE 1982

# VOLUME SUBJECT INDEX

A

**Action potential studies**
effects of lidocaine and quinidine on cardiac Purkinje fibers (rabbit), 17
**Adenosine**
coronary responsiveness during maximal dilation (dog), 510
**Adenosine pool**
cardiac, compartmentalization of (dog, rat), 617
**Adrenal response**
to angiotensin II (fetal lamb, sheep), 140
**Adriamycin**
interaction with cardiac myofibrillar proteins (dog), 547
**Androgens**
modulation of heart mitochondria and lysosomes (mouse, rat), 782
**Angiotensin II**
adrenal and renal responses (fetal lamb, sheep), 140
role in fetal adrenal and vascular responses to hemorrhage (lamb), 645
**Angiotensin II receptor**
vascular, regulation of (rat), 462
**Angiotensins I and II/IIi**
and cell culture of juxtaglomerular cell (rat), 822
**Animals (baboon)**
aortic and myocardial cytoplasmic progesterone receptors, 610
**Animals (calf)**
myocardial blood flow and coronary vascular reserve after exposure to high altitute, 714
**Animals (cat)**
choline acetyltransferase distribution in cerebral and extracerebral cranial arteries, 470
cholinergic mechanism in large cerebral artery, 870
comparative microcirculatory study, 240
effects of procainamide in acute and healed ischemic injury, 386
myocardial unloading, 788
**Animals (dog)**
$\beta$-adrenergic receptors and myocardial ischemia, 735
altered left ventricular diastolic properties during ischemia, 218
blood flow velocity in intramural and epicardial coronary arteries, 775
capsaicin stimulation of group IV afferents, 133
cardiac dynamics during hemorrhage, 705
compartmentalization of cardiac adenosine pool, 617
coronary arterial pressure and LV end-systolic pressure-volume relation, 727
coronary dilation after extra-activation, 38
coronary flow velocity during vasodilation, 695
coronary responsiveness during adenosine dilation, 510
correlates of myocardial oxygen consumption, 273
critical closure in pulmonary vasculature, 566
determination of coronary collateral flow by load line analysis, 663
effect of nitroglycerin and nifedipine on subendocardial perfusion in coronary stenosis, 678
effect of tissue anisotropy on extracellular potentials in the in situ myocardium, 342
effects of diltiazem and reduced serum-ionized calcium on ischemic ventricular fibrillation, 518
effects of pH on $Na^+$-$Ca^{++}$ exchange, 287
effects of pH on sarcoplasmic reticulum, 310
electrotonic interactions and ectopic activity in acute myocardial ischemia, 527
ethanol-induced alterations in pancreatic blood flow, 250
functional and anatomic effects on heart cells, 228
hypercapnic acidosis and renal sodium excretion, 294
hyperemic response to brief diastolic occlusion, 28
increased infarct size in chronic hypertension, 55
interaction of adriamycin with cardiac myofibrillar proteins, 547
intramyocardial pump action and coronary blood flow (Letter to the Editor), 747
intrarenal epinephrine receptors and the renal baroreceptor in control of plasma renin activity, 477
left ventricular dynamic geometry, 573
left ventricular energetics, 63
mechanical interactions between four heart chambers, 86
myocardial unloading, 788
non-hydrostatic pulmonary edema after coronary artery ligation, 301
pericardium in chronic volume overload, 501
power output; impedance and inotropic effects, 74
pressure-diameter relations during early diastole (Letters to the Editor), 440, 443
pulmonary lymph flow rate, 870
reentry based on structural complexities, 175
regulation of coronary blood flow during single diastoles, 377
subepicardial segment dimensions with coronary stenosis, 352
sympathetic pressor reflex during stretch of the thoracic aorta, 125
uptake and tissue content of myocardial fatty acids in ischemia and normoxia, 538
wall shear stress distribution in model artery (Letter to the Editor), 590
**Animals (guinea pig)**
increase in intracellular sodium ion activity during stimulation in cardiac muscle, 651
pH-dependent effects of quinidine, 210
**Animals (hamster)**
electrophysiology of normal and ischemic cardiac transplants, 599
preservation of myocardial contractility in cardiomyopathy, 405
**Animals (hog)**
energy cost of histamine in $K^+$-depolarized vascular smooth muscle, 848
energy cost of membrane depolarization in vascular smooth muscle, 839
**Animals (lamb)**
fetal; adrenal and renal responses to angiotensin II, 140
role of angiotensin II in adrenal and vascular responses to hemorrhage in fetus, 645
**Animals (mouse)**
modulation of heart mitochondria and lysosomes by androgens, 775
**Animals (pig)**
carnitine incorporation, effects of coronary flow, ischemia, and excess fatty acids, 767
electrotonic interactions and ectopic activity in acute myocardial ischemia, 527
force development by arterial smooth muscle, 799
modulation of $Ca^{++}$ sensitivity in vascular smooth muscle, 394
**Animals (rabbit)**
baroreflex control of heart rate and vascular resistance, 554
calcium exchange in myocardial ischemia, 360
effect of pH on sarcoplasmic reticulum, 310
effects of lidocaine and quinidine on cardiac Purkinje fibers, 17
increased economy of force generation in hypertrophy, 491
increase in intracellular sodium ion activity during stimulation in cardiac muscle, 651
myosin isozymes in cardiac hypertrophy, 839
rapid resetting of aortic baroreceptors, consequences of, 428

rate effects on slow response excitability, 419
thromboxane and renal resistance changes, 486
thyroid state and myosin isoenzymes, 117
**Animals (rat)**
adrenal medullary enzymes in hypertension, 742
cell culture of juxtaglomerular cells, 822
cerebral glucose use during hypotension, 633
compartmentalization of cardiac adenosine pool, 617
differentiation of myocytes in single cell cultures, 101
estrogens and increased vascular α-adrenergic receptor affinity, 805
hyperoncotic stimulation of renin release in isolated kidney, 400
mechanical properties of SHR aorta, 812
modulation of heart mitochondria and lysosomes by androgens, 782
norepinephrine and isolated single vascular muscle cells, 627
regulation of vascular angiotensin II receptor, 462
**Animals (sheep)**
adult and fetal; adrenal and renal responses to angiotensin II, 140
changes in intracellular sodium ion activity during stimulation in cardiac muscle, 651
coagulation, granulocytes, and lung vascular injury, 830
electrical activity and local anesthetics, 257
lung thromboxane release after endotoxin infusion, 688
quinidine-induced depression of $\dot{V}_{max}$ in cardiac Purkinje fibers, 369
**Aorta**
smooth muscle cells, force production and dynamic mechanical properties (rat), 812
**Arteries**
cranial distribution of choline acetyltransferase (cat), 470
**Atrium**
role of structural complexities in propagation of depolarization (dog), 175
**Autonomic receptors**
cardiac; concepts from radiolabeled ligand-binding studies, 161

**B**

**Baroreceptors**
arterial, consequences of rapid resetting (rabbit), 428
carotid, aortic, and cardiopulmonary; control of heart rate and vascular resistance (rabbit), 554
renal, interactions with intrarenal epinephrine receptors in control of plasma renin activity (dog), 477
**Blood flow**
coronary
and intramyocardial pump action (dog) (Letter to the Editor), 747
and myocardial energy demand (dog), 38
collateral, determination by load line analysis (dog), 663
effects on carnitine incorporation (pig), 767
regulation during individual diastoles (dog), 377
response to brief diastolic occlusion (dog), 28
pancreatic, ethanol-induced alterations in (dog), 250
regional myocardial, in animals exposed to simulated high altitude (calf), 714
**Blood flow velocity**
and changing stenosis geometry during coronary vasodilation (dog), 695
phasic, in intramural and epicardial coronary arteries (dog), 775
**Body surface mapping**
of His bundle activation (human), 47

**C**

**Calcium**
reduced, serum ionized; effects on ischemic ventricular fibrillation (dog), 518
**Calcium exchange**
effects of verapamil, quiescence, and cardioplegia (rabbit), 360
**Calcium sensitivity**
effects of calmodulin and cyclic AMP-dependent protein kinase (pig), 394
**Calmodulin**
modulation of $Ca^{++}$ sensitivity in vascular muscle (pig), 394
**Capillaries**
growth in skeletal and cardiac muscle, 451
**Capsaicin**
stimulation of group IV afferents (dog), 133
**Cardiac cells**
functional and anatomic effects of neuraminidase (dog), 228
**Cardiac dynamics**
during hemorrhage, relative unimportance of adrenergic inotropic responses (dog), 705
**Cardiomyopathy, hereditary**
and preservation of myocardial contractility by verapmil (hamster), 405
**Cardioplegia**
effect on calcium exchange in ischemic myocardium (rabbit), 360
**Carnitine**
uptake in aerobic and ischemic hearts (pig), 767
**Catecholamines**
and biosynthetic enzyme activities, in adrenal glands, in hypertension (rat), 742
correlates of myocardial oxygen consumption (dog), 273
estrogen and increased vascular sensitivity (rat), 805
**Cell growth**
ventricular, modulation by androgens (mouse, rat), 782
**Cerebral artery**
cholinergic mechanism in (cat), 870
**Choline acetyltransferase**
distribution in coronary arteries (cat), 470
**Cholinergic mechanism**
in cerebral artery (cat), 870
**Contraction-excitation**
feedback in myocardium, 757
**Coronary arteries**
intramural and epicardial phasic coronary blood flow velocity (dog), 775
**Coronary capacitive effects**
on diastolic pressure-flow relationships, 334
**Coronary dilation**
after extra-activation (dog), 38
**Coronary responsiveness**
during maximal adenosine-produced dilation (dog), 510
**Coronary stenosis**
and altered LV diastolic properties during ischemia (dog), 218
effect of nitroglycerin and nifedipine on subendocardial perfusion (dog), 678
**Coronary vascular reserve**
and simulated exposure to high altitude (calf), 714
**Crossbridge attachment**
in arterial smooth muscle (pig), 799

**D**

**Diastoles, single**
and regulation of coronary blood flow (dog), 377
**Diltiazem**
effects on ischemic ventricular fibrillation (dog), 518
**Dynamic geometry**
left ventricular (dog), 573

**E**

**Ectopic activity**
electrotonic interactions in acute regional myocardial ischemia (dog, pig), 527
**Electrical syncytium**
effects of discrete pattern of coupling on propagation, 192
**Electrotonic interactions**
and ectopic activity in myocardial ischemia (dog, pig), 527
**Endotoxin**
acute pulmonary hypertension and lung thromboxane release after infusion (sheep), 688
**Energetics**
left ventricular; heat loss and temperature distribution (dog), 63
**Enzymes**
adrenal medullary in hypertension (rat), 742

**Estrogens**
and increased vascular α-adrenergic receptor affinity (rat), 805
**Ethanol**
and pancreatic blood flow (dog), 250
**Extracellular potentials**
effects of tissue anisotropy (dog), 342

F

**Fatty acids**
excess, effects on carnitine incorporation (pig), 767
myocardial, under normoxic and ischemic conditions (dog), 538
**Fibrillation**
ischemic ventricular, and the effects of diltiazem and reduced serum-ionized calcium (dog), 518
**Force-velocity**
characteristics in normotensive and hypertensive aortas (rat), 812

G

**Glucose**
cerebral, and alterations in utilization during hemorrhagic hypotension (rat), 633
**Granulocytes**
role in lung vascular injury after fat marrow embolism (sheep), 830

H

**Hemorrhage**
and cardiac dynamics; relative unimportance of adrenergic inotropic responses (dog), 705
role of angiotensin II in adrenal and vascular responses during fetal development (lamb), 645
**High force development**
in arterial smooth muscle (pig), 799
**His bundle activation**
surface mapping (human), 47
**Histamine**
energy cost, in $K^+$-depolarized vascular smooth muscle (hog), 848
**Hormone receptors**
aortic and myocardial, biochemical characterization of (baboon), 610
**Hypercapnic acidosis**
and renal sodium excretion (dog), 294
**Hyperoncotic perfusion**
and stimulation of renin release (rat), 400
**Hypertension**
chronic and increased infarct size, (dog), 55
vasodilator capacity in relatives of hypertensive patients, 671
**Hypertrophy**
cardiac
altered myosin isozyme patterns (rabbit), 856
comparative sequence of myosin light chains (human), 201
increased economy of force generation (rabbit), 491
left ventricular, and increased infarct size (dog), 55
**Hypotension**
hemorrhagic, and alterations in local cerebral glucose utilization (rat), 633

I

**Indomethacin**
protective effect, in non-hydrostatic pulmonary edema (dog), 301
**Intramyocardial pump**
and diastolic-systolic coronary flow (dog) (Letter to the Editor), 747
**Intravascular coagulation**
role in lung vascular injury after fat marrow embolism (sheep), 830
**Ischemia**
altered left ventricular properties during (dog), 218
effects on carnitine incorporation (pig), 767
electrophysiology of cardiac transplants, normal and ischemic (hamster), 599
global, effects of coronary arterial pressure on LV end-systolic pressure-volume relation (dog), 727
myocardial
and effects of verapamil, quiescence, and cardioplegia on calcium exchange (rabbit), 360
electrotonic interactions as cause of ectopic activity (dog, pig), 527
uptake and tissue content of fatty acids in myocardium (dog), 538
**Ischemic injury**
acute and healed, electrophysiological effects of procainamide (cat), 386
**Isoenzymes** (see also Isozymes)
ventricular myosin, thyroxine-induced redistribution (rabbit), 117
**Isometric force generation**
in cardiac hypertrophy (rabbit), 491
**Isoproterenol**
chronotropic response in the differentiation of myocardial cells (rat), 101
**Isozymes** (see also Isoenzymes)
myosin; in cardiac hypertrophy (rabbit), 856

J

**Juxtaglomerular cells**
cell culture of (rat), 822

L

**Left ventricular energetics**
heat loss and temperature distribution (dog), 63
**Lidocaine**
effect on electrical activity in cardiac Purkinje fibers (sheep), 257
effects on cardiac Purkinje fibers (rabbit), 17
**Load line analysis**
determination of coronary collateral flow (dog), 663
**Lung thromboxane release**
after endotoxin infusion (sheep), 688
**Lung vascular injury**
role of intravascular coagulation and granulocites after fat marrow embolism (sheep), 830
**Lymph flow**
effect of outflow pressure (dog), 870
**Lysosomes, ventricular**
modulation by androgens (mouse, rat), 782

M

**Maximum upstroke velocity**
quinidine-induced depression (sheep), 369
**Mechanical interactions**
between four heart chambers (dog), 86
**Membrane depolarization**
in carotid artery, energy cost of (hog), 839
**Metabolic functions**
of pulmonary circulation, 325
**Microcirculatory studies**
a comparative analysis (cat), 240
**Microelectrodes**
extracellular $K^+$-selective, 1
**Mitochondria**
ventricular, modulation by androgens (mouse, rat), 782
**Muscle**
arterial smooth, force development (pig), 799
atrial
mammalian, relaxation properties of (Letter to the Editor), 440
role of structural complexities in propagation of depolarization (dog), 175
cardiac
growth of capillaries, 451
increase in intracellular sodium ion activity during stimulation (mammals), 651
$K^+$ fluctuations in extracellular spaces, 1
RV papillary, normal and hypertrophied, a characterization of heat liberation, 491

skeletal
effects of capsaicin and bradykinin on afferent fibers (dog), 133
growth of capillaries, 451
vascular smooth
effect of calmodulin and cyclic AMP-dependent protein kinase on calcium sensitivity (pig), 394
energy cost of histamine in $K^+$-depolarized VSM (hog), 848
energy cost of membrane depolarization (hog), 839
ventricular
effects of procainamide in acute and healed ischemic injury (cat), 386
**Muscle cells**
single vascular, norepinephrine sensitivity and desensitization (rat), 627
**Myocardial contractility**
preservation by verapamil in hereditary cardiomyopathy (hamster), 405
**Myocardial fiber orientation**
role in subepicardial segmental function during coronary stenosis (dog), 352
**Myocardial ischemia**
$\beta$-adrenergic receptor numbers and physiological responsiveness to isoproterenol and epinephrine (dog), 735
**Myocardial unloading**
structure, composition, and function (cat, dog), 788
**Myocardium**
contraction-excitation feedback, 757
effect of anisotropy on extracellular potentials (dog), 342
load regulation (cat, dog), 788
**Myocytes**
differentiation in single cell cultures (rat), 101
**Myosin isozymes**
in cardiac hypertrophy (rabbit), 856
**Myosin light chains**
from normal and hypertrophied hearts (human), 201
**Myosin, ventricular**
thyroxine-induced redistribution of isoenzymes (rabbit), 117

N

**$Na^+$-$Ca^{++}$ exchange**
effects of pH, in cardiac sarcolemmal vesicles (dog), 287
**Neuraminidase**
functional and anatomic effects on heart cells (dog), 228
**Nifedipine**
effect on subendocardial perfusion in flow-limiting coronary stenosis (dog), 678
**Nitroglycerin**
effect on subendocardial perfusion in flow-limiting coronary stenosis (dog), 678
**Norepinephrine**
and isolated single vascular muscle cells (rat), 627

O

**Occlusion**
brief diastolic, and regulation of coronary blood flow (dog), 28
**Outflow pressure**
effect on pulmonary lymph flow rate (dog), 865
**Oxygen consumption**
myocardial, and problem of catecholamine oxygen wasting (dog), 273

P

**Pericardium**
in chronic volume overload (dog), 501
role in mechanical interactions of heart chambers (dog), 86
**pH**
effect on cardiac sarcoplasmic reticulum (dog, rabbit), 310
effect on $Na^+$-$Ca^{++}$ exchange in cardiac sarcolemmal vesicles (dog), 287
**Plasma renin activity**
interactions between intrarenal receptors and renal baroreceptor (dog), 477
**Power output**
of left ventricle (dog), 74
**Pressor sympathetic reflex**
during stretch of the thoracic aorta (dog), 125
**Pressure-diameter relations**
during early diastole (dog) (Letters to the Editor), 440, 443
**Pressure-flow relationships**
and critical closing pressure (dog), 566
diastolic, coronary capacitive effects on, 334
**Pressure-volume relationships**
LV end-systolic, effects of coronary artery pressure (dog), 727
ventricular, mechanical interactions between four heart chambers (dog), 86
**Procainamide**
effect on electrical activity in cardiac Purkinje fibers (sheep), 257
electrophysiological effects in acute and healed ischemic injury (cat), 386
**Propagation**
through an electrical syncytium, 192
**Protein kinase**
cyclic AMP-dependent, and calcium sensitivity in vascular muscle (pig), 394
**Proteins**
cardiac myofibrillar; and interaction of adriamycin (dog), 547
**Pulmonary circulation**
metabolic functions of, 325
**Pulmonary edema**
non-hydrostatic, after coronary artery ligation (dog), 301
**Pulmonary vasculature**
critical closure in (dog), 566
**Purkinje fibers**
cardiac
effects of lidocaine and quinidine (rabbit), 17
quinidine-induced depression of maximum upstroke velocity (sheep), 369
shortening of action potential and reduction of pacemaker activity by anesthetics (sheep), 257

Q

**Quiescence**
effect on calcium exchange in ischemic myocardium (rabbit), 360
**Quinidine**
depression of maximum upstroke velocity in cardiac Purkinje fibers (sheep), 369
effect on cardiac Purkinje fibers (rabbit), 17
effect on electrical activity in cardiac Purkinje fibers (sheep), 257
pH-dependent effects (guinea pig), 210

R

**Radioligand-binding studies**
(labeled) and cardiac autonomic receptors, 161
**Rate effects**
on slow response excitability (rabbit), 419
**Receptors**
$\beta$-adrenergic, physiological responsiveness to isoproterenol and epinephrine (dog), 735
cardiac autonomic, concepts from radiolabeled ligand-binding studies, 161
intrarenal epinephrine, interactions with renal baroreceptor in control of plasma renin activity (dog), 477
progesterone, aortic and myocardial biochemical characterization of (baboon), 610
**Renal resistance**
effects of thromboxane (rabbit), 486
**Renal response**
to angiotensin II (fetal lamb, sheep), 140
**Renal sodium excretion**
and hypercapnic acidosis (dog), 294
**Renin release**
stimulation by hyperoncotic perfusion (rat), 400

S

**Sarcoplasmic reticulum**
cardiac and skeletal, comparison of effects on pH (dog, rabbit), 310

**Segmental shortening**
during coronary stenosis (dog), 352
**Sinoatrial conduction**
electrical activity (Letter to the Editor), 148
**Sinus node region**
electrical activity (Letter to the Editor), 148
**Slow response excitability**
and rate effects (rabbit), 419
**Sodium ion activity**
intracellular, increase during stimulation in mammalian cardiac muscle, 651
**Stenosis geometry**
changes in, during coronary vasodilation (dog), 695
**Structural complexities**
role in propagation of depolarization in the atrium (dog), 175
**Subepicardial shortening**
during coronary stenosis (dog), 352
**Subjects (human)**
recording of His bundle activation, 47
sequence of cardiac myosin light chains, 201
vasodilator capacity in normotensive subjects with hypertensive relatives, 671
**Sympathetic pressor reflex**
during stretch of the thoracic aorta (dog), 125

T

**Testosterone**
sexual dimorphism of the heart (mouse, rat), 782
**Thromboxane**
and renal resistance changes in hydronephrotic kidney (rabbit), 486
**Thyroid state**
and myosin isoenzymes (rabbit), 117
**Tissue anisotropy**
effect on extracellular potentials (dog), 342
**Transplants**
normal and ischemic, electrophysiology of (hamster), 599

V

**Vasodilator capacity**
in normotensive subjects with hypertensive relatives, 671
**Ventricles**
left
dynamic geometry (dog), 573
power output; impedence and inotropic effects (dog), 74
**Ventricular myocardium**
pH-dependent effects of quinidine (guinea pig), 210
**Verapamil**
effect on calcium exchange in ischemic myocardium (rabbit), 360
preservation of myocardial contractility in hereditary cardiomyopathy (hamster), 405
$\dot{V}_{max}$
quinidine-induced depression (sheep), 369
**Voltage clamp studies**
and $K^+$ fluctuations, 1
effects of lidocaine and quinidine on Purkinje fibers (rabbit), 17
**Volume overload**
and influence of pericardium on LV end-diastolic pressure-segment relations (dog), 501

W

**Wall shear stress**
distribution in model artery (dog) (Letter to the Editor), 590

**AMERICAN HEART ASSOCIATION, INC.**

# Circulation Research

## An Official Journal of the American Heart Association

*Circulation Research* provides a medium for bringing together basic research on the cardiovascular system from various disciplines including biology, biochemistry, biophysics, morphology, pathology, physiology, and pharmacology. The Journal also will accept for publication manuscripts on clinical research that contribute to an understanding of fundamental problems.

*Editor*
FRANCOIS M. ABBOUD

*Associate Editors*

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

VOLUME 50

January–June 1982

## No. 1 (January)

**Brief Reviews: $K^+$ Fluctuations in the Extracellular Spaces of Cardiac Muscle. Evidence from the Voltage Clamp and Extracellular $K^+$-Selective Microelectrodes.** *Ira Cohen and Richard Kline* 1

**Mechanisms of Action of Lidocaine and Quinidine on Action Potential Duration in Rabbit Cardiac Purkinje Fibers: An Effect on Steady State Sodium Currents?** *Thomas J. Colatsky* 17

**Hyperemic Response of the Coronary Circulation to Brief Diastolic Occlusion in the Conscious Dog.** *Gregory G. Schwartz, Philip A. McHale, and Joseph C. Greenfield, Jr.* 28

**Coronary Vasodilation after a Single Ventricular Extra-Activation in the Conscious Dog.** *Gregory G. Schwartz, Philip A. McHale, and Joseph C. Greenfield, Jr.* 38

**A Dynamic Electrical Record of the Pathway of Human His Bundle Activation from Surface Mapping.** *Leon G. Horan, Nancy C. Flowers, and Gurbachan S. Sohi* 47

**Increased Size of Myocardial Infarction in Dogs with Chronic Hypertension and Left Ventricular Hypertrophy.** *Samon Koyanagi, Charles L. Eastham, David G. Harrison, and Melvin L. Marcus* 55

**Left Ventricular Energetics: Heat Loss and Temperature Distribution of Canine Myocardium.** *Gabriél H.M. ten Velden, Gijs Elzinga, and Nico Westerhof* 63

**The Effects of Peripheral Impedance and Inotropic State on the Power Output of the Left Ventricle in Dogs.** *H. Phoebe Sdougos, Donald L. Schultz, Lip-Bun Tan, Derek H. Bergel, Bheeshma Rajagopalan, and Grant de J. Lee* 74

**Mechanical Interactions between Four Heart Chambers with and without the Pericardium in Canine Hearts.** *Yukio Maruyama, Kouichi Ashikawa, Shogen Isoyama, Hiroshi Kanatsuka, Eiji Ino-Oka, and Tamotsu Takishima* 86

**Differentiation of Rat Myocytes in Single Cell Cultures with and without Proliferating Nonmyocardial Cells: Cross-Striations, Ultrastructure, and Chronotropic Response to Isoproterenol.** *Paul Simpson and Shoshana Savion* 101

**Thyroxine-Induced Redistribution of Isoenzymes of Rabbit Ventricular Myosin.** *Anne F. Martin, Edward D. Pagani, and R. John Solaro* 117

**A Positive Feedback Sympathetic Pressor Reflex during Stretch of the Thoracic Aorta in Conscious Dogs.** *Massimo Pagani, Paolo Pizzinelli, Mario Bergamaschi, and Alberto Malliani* 125

**Effects of Capsaicin and Bradykinin on Afferent Fibers with Endings in Skeletal Muscle.** *Marc P. Kaufman, Gary A. Iwamoto, John C. Longhurst and Jere H. Mitchell* 133

**Comparison of the Adrenal and Renal Responses to Angiotensin II in Fetal Lambs and Adult Sheep.** *Jean E. Robillard, R. Ariel Gomez, Dianna VanOrden, and Fred G. Smith, Jr.* 140

**Letters to the Editor** 148

**Instructions to Authors** 150

**News from the American Heart Association** 154

## No. 2 (February)

**Brief Reviews: Cardiac Autonomic Receptors: Recent Concepts from Radiolabeled Ligand-Banding Studies.** *August M. Watanabe, Larry R. Jones, Allan S. Manalan, and Henry R. Besch, Jr.* 161

**The Functional Role of Structural Complexities in the Propagation of Depolarization in the Atrium of the Dog: Cardiac Conduction Disturbances Due to Discontinuities of Effective Axial Resistivity.** *Madison S. Spach, Walter T. Miller, III, Paul C. Dolber, J. Mailen Kootsey, Joachim R. Sommer, and Charles E. Mosher, Jr* 175

**Effects of the Discrete Pattern of Electrical Coupling on Propagation through an Electrical Syncytium.** *Ronald W. Joyner* 192

**Comparative Sequence of Myosin Light Chains from Normal and Hypertrophied Human Hearts.** *Catherine Klotz, Jean J. Leger, and Marshall Elzinga* 201

**pH-Dependent Effects of Quinidine on the Kinetics of $dV/dt_{max}$ in Guinea Pig Ventricular Myocardium.** *Augustus O. Grant, Joey L. Trantham, Kathleen K. Brown, and Harold C. Strauss* 210

**Altered Left Ventricular Diastolic Properties during Pacing-Induced Ischemia in Dogs with Coronary Stenoses: Potentiation by Caffeine.** *Walter J. Paulus, Takashi Serizawa, and William Grossman* 218

**Electrophysiological and Electron Microscopic Correlations Concerning the Effects of Neuraminidase on Canine Heart Cells.** *W. Thomas Woods, Kikuko Imamura, and Thomas N. James* 228

**Microcirculation of Left Atrial Muscle, Cerebral Cortex, and Mesentery of the Cat: A Comparative Analysis.** *Bing-Lo Chang, Takashi Yamakawa, Jill Nuccio, Ron Pace, and Richard J. Bing* 240

**Ethanol-Induced Alterations in Pancreatic Blood Flow in Conscious Dogs.** *Lawrence D. Horwitz and J. Hurley Myers* 250

**Shortening of the Action Potential and Reduction of Pacemaker Activity by Lidocaine, Quinidine, and Procainamide in Sheep Cardiac Purkinje Fibers: An Effect on Na or K Currents?** *Edward Carmeliet and Tetsunori Saikawa* 257

**Work as a Correlate of Canine Left Ventricular Oxygen Consumption, and the Problem of Catecholamine Oxygen Wasting.** *G. Alex Rooke and Eric O. Feigl* 273

**Effects of pH on $Na^+$-$Ca^{2+}$ Exchange in Canine Cardiac Sarcolemmal Vesicles.** *Kenneth D. Philipson, Malcolm M. Bersohn, and Ann Y. Nishimoto* 287

**Role of Renal Nerves, Angiotensin II, and Prostaglandins in the Antinatriuretic Response to Acute Hypercapnic Acidosis in the Dog.** *Robert J. Anderson, William L. Henrich, Peter A. Gross, and Mark A. Dillingham* 294

**Non-Hydrostatic Pulmonary Edema after Coronary Artery Ligation in Dogs: Protective Effect of Indomethacin.** *J. Franklin Richeson, Craig Paulshock, and Paul N. Yu* 301

**The Effect of pH on the Transient-State Kinetics of $Ca^{2+}$-$Mg^{2+}$-ATPase of Cardiac Sarcoplasmic Reticulum: A Comparison with Skeletal Sarcoplasmic Reticulum.** *Frederic Mandel, Evangelia Galani Kranias, Angela Grassi de Gende, Michihiro Sumida, and Arnold Schwartz* 310

**News from the American Heart Association** 318

## No. 3 (March)

**Brief Reviews: Metabolic Functions of the Pulmonary Circulation.** *Sami I. Said* 325

**The Effects of the Coronary Capacitance on the Interpretation of Diastolic Pressure-Flow Relationships.** *Calvin Eng, John H. Jentzer, and Edward S. Kirk* 334

**Effect of Tissue Anisotropy on Extracellular Potential Fields in Canine Myocardium in Situ.** *David E. Roberts and Allen M. Scher* 342

**Subepicardial Segmental Function during Coronary Stenosis and the Role of Myocardial Fiber Orientation.** *Kim P. Gallagher, Genta Osakada, Otto M. Hess, James A. Koziol, W. Scott Kemper, and John Ross, Jr.* 352

**The Effects of Verapamil, Quiescence, and Cardioplegia on Calcium Exchange and Mechanical Function in Ischemic Rabbit Myocardium.** *Patrick D. Bourdillon and Philip A. Poole-Wilson* 360

**Mechanisms of Quinidine-Induced Depression of Maximum Upstroke Velocity in Ovine Cardiac Purkinje Fibers.** *Francis M. Weld, James Coromilas, Jeffrey N. Rottman, and J. Thomas Bigger, Jr.* 369

**Regulation of Coronary Blood Flow during Individual Diastoles in the Dog.** *William P. Dole and Vernon S. Bishop* 377

**Electrophysiological Effects of Procainamide in Acute and Healed Experimental Ischemic Injury of Cat Myocardium.** *Robert J. Myerburg, Arthur L. Bassett, Kristina Epstein, Marion S. Gaide, Patricia Kozlovskis, Sam S. Wong, Agustin Castellanos, and Henry Gelband* 386

**Vascular Smooth Muscle: Calmodulin and Cyclic AMP-Dependent Protein Kinase Alter Calcium Sensitivity in Porcine Carotid Skinned Fibers.** *J. Caspar Rüegg and Richard J. Paul* 394

**Stimulation of Renin Release by Hyperoncotic Perfusion of the Isolated Rat Kidney.** *Andrew J. Cohen, Katherine Spokes, Robert S. Brown, Jeffrey S. Stoff, and Patricio Silva* 400

**Verapamil Preserves Myocardial Contractility in the Hereditary Cardiomyopathy of the Syrian Hamster.** *Jean-Lucien Rouleau, Leonard H.S. Chuck, Gabor Hollosi, Parris Kidd, Richard E. Sievers, Joan Wikman-Coffelt, and William W. Parmley* 405

**Effects of Changes in Extracellular Ionic Concentrations on Aortic Baroreceptors with Nonmyelinated Afferent Fibers.** *Peter Thoren, Michael C. Andersen, and Arthur M. Brown* 413

**Rate and Rhythm Dependency of Propagation from Normal Myocardium to a $Ba^{++}$, $K^+$-induced Slow Response Zone in Rabbit Left Atrium.** *Masako Oya Masuda and Antonio Paes de Carvalho* 419

**Rapid Resetting of the Aortic Baroreceptors in the Rabbit and Its Implications for Short-Term and Longer Term Reflex Control.** *Patricia K. Dorward, Michael C. Andresen, Sandra L. Burke, Judith R. Oliver, and Paul I. Korner* 428

**Letters to the Editor** 440

**News from the American Heart Association** 445

## No. 4 (April)

**Brief Reviews: Growth of Capillaries in Skeletal and Cardiac Muscle.** *Olga Hudlická* 451

**Sodium, Divalent Cations, and Guanine Nucleotides Regulate the Affinity of the Rat Mesenteric Artery Angiotensin II Receptor.** *Gregory B. Wright, R. Wayne Alexander, Laurie S. Ekstein, and Michael A. Gimbrone, Jr.* 462

**Distribution of Choline Acetyltransferase in Cerebral and Extracerebral Cranial Arteries of the Cat: Its Relationship to Neurogenic Atropine-Sensitive Dilation.** *J.A. Bevan, G.M. Buga, V.M. Florence, A. Gonsalves, and A. Snowden* 470

**Interactions between Intrarenal Epinephrine Receptors and the Renal Baroreceptor in the Control of PRA in Conscious Dogs.** *Eli R. Farhi, James R. Cant, and A. Clifford Barger* 477

**Contribution of Thromboxane to Renal Resistance Changes in the Isolated Perfused Hydronephrotic Rabbit Kidney.** *Akiyoshi Kawasaki and Philip Needleman* 486

**Increased Myothermal Economy of Isometric Force Generation in Compensated Cardiac Hypertrophy Induced by Pulmonary Artery Constriction in the Rabbit: A Characterization of Heat Liberation in Normal and Hypertrophied Right Ventricular Papillary Muscles.** *Norman R. Alpert and Louis A. Mulieri* 491

**Influence of the Pericardium on Left Ventricular End-Diastolic Pressure-Segment Relations during Early and Later Stages of Experimental Chronic Volume Overload in Dogs.** *Martin M. LeWinter and Richard Pavelec* 501

**Responses to Cardiac Sympathetic Nerve Stimulation during Maximal Coronary Dilation Produced by Adenosine.** *U. James Johannsen, Allyn L. Mark, and Melvin L. Marcus* 510

**The Effects of Diltiazem and Reduced Serum Ionized Calcium on Ischemic Ventricular Fibrillation in the Dog.** *William T. Clusin, Michael R. Bristow, Donald S. Baim, John S. Schroeder, Patrice Jaillon, Peter Brett, and Donald C. Harrison* 518

**Electrotonic Interactions Across an Inexcitable Region as a Cause of Ectopic Activity in Acute Regional Myocardial Ischemia: A Study in Intact Porcine and Canine Hearts and Computer Models.** *Michiel J. Janse and Frans J.L. van Capelle* 527

**Uptake and Tissue Content of Fatty Acids in Dog Myocardium under Normoxic and Ischemic Conditions.** *G.J. van der Vusse, Th.H.M. Roemen, F.W. Prinzen, W.A. Coumans, and R.S. Reneman* 538

**Interaction of Adriamycin in Vitro with Cardiac Myofibrillar Proteins.** *William Lewis, Jerome Kleinerman, and Saul Puszkin* 547

**Differential Baroreflex Control of Heart Rate and Vascular Resistance in Rabbits: Relative Role of Carotid, Aortic, and Cardiopulmonary Baroreceptors.** *Gary B. Guo, Marc D. Thames, and Francois M. Abboud* 554

**Critical Closure in the Canine Pulmonary Vasculature.** *Ruth Graham, Constance Skoog, Luis Oppenheimer, John Rabson, and Howard S. Goldberg* 566

**Left Ventricular Dynamic Geometry in the Intact and Open Chest Dog.** *Keith R. Walley, Maleah Grover, Gilbert L. Raff, J. William Benge, Blake Hannaford, and Stanton A. Glantz* 573

**Letters to the Editor** 590

**News from the American Heart Association** 591

## No. 5 (May)

**Electrophysiological Response of Vascularized Hamster Cardiac Transplants to Ischemia.** *Robert F. Gilmour, Jr., and Douglas P. Zipes* 599

**Hormone Receptors of the Baboon Cardiovascular System: Biochemical Characterization of Aortic and Myocardial Cytoplasmic Progesterone Receptors.** *Alan L. Lin, Henry C. McGill, Jr., and Sydney A. Shain* 610

**Compartmentalization of the Adenosine Pool of Dog and Rat Hearts.** *R. A. Olsson, D. Saito, and C. R. Steinhart* 617

**Norepinephrine Sensitivity and Densensitization of Cultured Single Vascular Muscle Cells.** *Kent Hermsmeyer and Ron Mason* 627

**Alterations in Local Cerebral Glucose Utilization during Hemorrhagic Hypotension in the Rat.** *Helen E. Savaki, Helen Macpherson, and James McCulloch* 633

**Role of Angiotensin II on the Adrenal and Vascular Responses to Hemorrhage during Development in Fetal Lambs.** *Jean E. Robillard, R. Ariel Gomez, John G. Meernik, William D. Kuehl, and Dianna VanOrden* 645

**Increase in Intracellular Sodium Ion Activity during Stimulation in Mammalian Cardiac Muscle.** *Charles J. Cohen, Harry A. Fozzard, and Shey-Shing Sheu* 651

**Determination of Coronary Collateral Flow by a Load Line Analysis.** *David Wyatt, Jinku Lee, and James M. Downey* 663

**Limited Maximal Vasodilator Capacity of Forearm Resistance Vessels in Normotensive Young Men with a Familial Predisposition to Hypertension.** *Akira Takeshita, Tsutomu Imaizumi, Toshiaki Ashihara, Kunihiko Yamamoto, Sumio Hoka, and Motoomi Nakamura* 671

**Effect of Nitroglycerin and Nifedipine on Subendocardial Perfusion in the Presence of a Flow-Limiting Coronary Stenosis in the Awake Dog.** *Robert J. Bache and Bruce A. Tockman* 678

**Acute Pulmonary Hypertension and Lung Thromboxane Release after Endotoxin Infusion in Normal and Leukopenic Sheep.** *Peter C. Hüttemeier, W. David Watkins, Myron B. Peterson, and Warren M. Zapol* 688

**Physiological Significance of Coronary Flow Velocity and Changing Stenosis Geometry during Coronary Vasodilation in Awake Dogs.** *K. Lance Gould and Katherine O. Kelley* 695

**Cardiac Dynamics during Hemorrhage: Relative Unimportance of Adrenergic Inotropic Responses.** *Thomas H. Hintze and Stephen F. Vatner* 705

**Regional Myocardial Blood Flow and Coronary Vascular Reserve in Unanesthetized Young Calves Exposed to a Simulated Altitude of 3500 m for 8–109 Weeks.** *Murli Manohar, Christine M. Parks, Michael A. Busch, William J. Tranquilli, Gerald E. Bisgard, Thomas A. McPherron, and Michael C. Theodorakis* 714

**Effects of Coronary Arterial Pressure on Left Ventricular End-Systolic Pressure-Volume Relation of Isolated Canine Heart.** *Kenji Sunagawa, W. Lowell Maughan, Gottlieb Friesinger, Pablo Guzman, Mau-Song Chang, and Kiichi Sagawa* 727

**Relationship between β-Adrenergic Receptor Numbers and Physiological Responses during Experimental Canine Myocardial Ischemia.** *Amal Mukherjee, Larry R. Bush, Ken E. McCoy, Rebecca J. Duke, Herbert Hagler, L. Maximilian Buja, and James T. Willerson* 735

**Biosynthetic Enzyme Activities and Catecholamines in Adrenal Glands of Genetic and Experimental Hypertensive Rats.** *Horst Grobecker, Juan M. Saavedra, and Virginia K. Weise* 742

**Letters to the Editor** 747

**Errata** 749

**News from the American Heart Association** 750

## No. 6 (June)

**Brief Reviews: Contraction-Excitation Feedback in Myocardium: Physiological Basis and Clinical Relevance.** *Max J. Lab* 757

**Properties of Carnitine Incorporation in Working Swine Hearts: Effects of Coronary Flow, Ischemia, and Excess Fatty Acids.** *A. James Liedtke, Thomas C. Vary, Stephen H. Nellis, and Craig W. Fultz* ... 767

**Phasic Coronary Blood Flow Velocity in Intramural and Epicardial Coronary Arteries.** *William M. Chilian and Melvin L. Marcus* ... 775

**Testosterone-Mediated Sexual Dimorphism of the Rodent Heart: Ventricular Lysosomes, Mitochondria, and Cell Growth are Modulated by Androgens.** *Harold Koenig, Alfred Goldstone, and Chung Y. Lu* ... 782

**Load Regulation of the Structure, Composition, and Function of Mammalian Myocardium.** *George Cooper, IV, and Robert J. Tomanek* ... 788

**High Force Development and Crossbridge Attachment in Smooth Muscle from Swine Carotid Arteries.** *Patrick F. Dillon and Richard A. Murphy* ... 799

**Increased Vascular Catecholamine Sensitivity and $\alpha$-Adrenergic Receptor Affinity in Female and Estrogen-Treated Male Rats.** *Wilson S. Colucci, Michael A. Gimbrone, Jr., Margaret K. McLaughlin, William Halpern, and R. Wayne Alexander* ... 805

**Force-Velocity Characteristics and Active Tension in Relation to Content and Orientation of Smooth Muscle Cells in Aortas from Normotensive and Spontaneously Hypertensive Rats.** *Anders Arner and Bengt Uvelius* ... 812

**Juxtaglomerular Cells Grown as Monolayer Cell Culture Contain Renin, Angiotensin I-Converting Enzyme, and Angiotensins I and II/III.** *Wilton A. Rightsel, Tomio Okamura, Tadashi Inagami, James A. Pitcock, Yukio Takii, Bennie Brooks, Peggy Brown, and E.E. Muirhead* ... 822

**Role of Intravascular Coagulation and Granulocytes in Lung Vascular Injury after Bone Marrow Embolism.** *Philip S. Barie and Asrar B. Malik* ... 830

**Energy Cost of Membrane Depolarization in Hog Carotid Artery.** *John W. Peterson and Elvira Glück* ... 839

**Effect of Histamine on the Energy Metabolism of $K^+$-Depolarized Hog Carotid Artery.** *John W. Peterson* ... 848

**Altered Myosin Isozyme Patterns from Pressure-Overloaded and Thyrotoxic Hypertrophied Rabbit Hearts.** *Raye Z. Litten, III, Barbara Jill Martin, Robert B. Low, and Norman R. Alpert* ... 856

**Effect of Outflow Pressure upon Lymph Flow from Dog Lungs.** *R.E. Drake, D.K. Adcock, R.L. Scott, and J.C. Gabel* ... 865

**Cholinergic Mechanism in the Large Cat Cerebral Artery.** *Tony Jer-Fu Lee* ... 870

**News from the American Heart Association** ... 880

**Volume Author Index** ... 885

**Volume Subject Index** ... 887
